

Crightons

ENGINEERING

"Where success is measured by the megalitre"

As one of the largest Engineering Works in the Riverina Area, with over 30 years of experience, Crighton's boasts modern undercover workshops equipped to solve your service needs. We have customized our facility to accommodate all of your pump & flow meter servicing needs. Our plant is comprehensive with equipped field service units & 3 mobile cranes, to bring our solutions to your site.

We specialize in a broad range of field & workshop capabilities with an experienced team that can assist in a diverse range of tasks including:

- Servicing & upgrading Water Supply and Treatment Plants
- Custom solutions for pumping problems
- Crane Hire and Pile Driving
- Field servicing of Plant
- Confined space and Height safety work
- Design and repair pump installations
- Over haul of submersible axial flow pumps.
- Design, machining & fabrication of steel & stainless steel componentry.

Agents for:

- Macquarie Pumps
- Elster & MACE mechanical & Doppler ultrasonic flow meters.
- Suppliers of Cat Cummins, Twin Disc, & Murphy engine protection components.

Crighton's can supply you with the solution's you need & the products needed for your solutions.
